PART V. SPECIAL REQUIREMENTS FOR EMERGENCY ENGINES ONLY

- A.** An emergency engine is defined as a new or existing stationary reciprocating engine or turbine engine which is used as a means of providing mechanical or electrical power only during periods of routine testing and scheduled maintenance or during an emergency. Emergency engine does not include an engine with respect to which the permittee is party to an agreement to sell electrical power from such engine to an electrical utility, or receives any reduction in the cost of electrical power for agreeing to supply electrical power from such engine during periods of reduced voltage or reduced power availability.
- B.** This equipment must be dedicated solely to responding in emergency situations. "Emergency" means an unforeseeable occurrence or condition that is beyond the permittee's control, and that:
1. results in an interruption of electrical power from the supplying electrical utility to the subject premise;
 2. results in a deviation in the voltage to the subject premise of greater than three percent above or five percent below the standard nominal voltage specified by the supplying electrical utility in accordance with the Regulations of Connecticut State Agencies, Section 16-11-115(a);
 3. requires an interruption of electrical power from the supplying electrical utility to the subject premise to enable the permittee to perform emergency repairs; or
 4. requires operation of the subject emergency engine to minimize damage from fire, flood waters, or other conditions resulting from such emergency.
- C.** The permittee shall not conduct routine scheduled testing or maintenance of the subject engine during days when ambient ozone is forecasted by the commissioner to be moderate to unhealthful, unhealthful, or very unhealthful.
1. Forecast Information
Official ambient ozone information can be obtained by calling:
 - i. (860) 424-4167 Department's Bureau of Air Management
